Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: the prior art of record does not teach nor fairly suggest a lid as claimed. Specifically, there is no teaching of a lid having a depression in a platform, closure plate received within walls of the depression and being pivotally mounted at a proximal end thereof relative to the depression, and a pull ring pivotally connected to a distal end of the closure plate. While the most of the prior art of record teaches lids having a depression in a platform and closure plate received within walls of the depression and being pivotally mounted at a proximal end thereof relative to the depression, there is no suggestion, motivation or teaching to provide a pull ring additionally pivotally mounted to a distal end of the closure plate. The patent to Morawski (US 3,049,264) teaches a lid having a platform 20 with a drinking opening and a vent opening, and a cover hingedly connected at a proximal end to the platform and a pull tab hingedly connected to a distal end of the cover, the pull tab being actuated to release the plate edge from its engagement with the rim flange. There is no teaching of a depression in the platform relative to the upper face of the platform. There is no teaching, motivation, or suggestion in any of the prior art references to combine the teaching of the cover of Morawski to any of the other closure lids of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Various prior art closures teaching features similar to those disclosed and/or claimed are cited for their disclosures.

Application/Control Number: 10/652,321 Page 3

Art Unit: 3727

3. In order to reduce pendency and avoid potential delays, Group 3720 is encouraging FAXing of responses to Office Actions directly into the Group at (571) 273-8300. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into Group 3720 will be promptly forwarded to the examiner.

4. It is called to applicant's attention that if a communication is faxed before the reply time has expired, applicant may submit the reply with a "Certificate of Facsimile" which merely asserts that the reply is being faxed on a given date. So faxed, before the period for reply has expired, the reply may be considered timely. A suggested format for a certificate follows:

The L	I hereby certify that this correspondence for Application Serial No is being facsir U.S. Patent and Trademark Office via fax number 571-273-8300 on the date shown below:	niled to
	Typed or printed name of person signing this certificate	
	Signature	
	Date	

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robin Hylton whose telephone number is (571) 272-4540. The examiner can normally be reached Monday - Friday from 9:00 a.m. to 4:00 p.m. (Eastern time).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nathan Newhouse, can be reached on (571) 272-4544.

If in receiving this Office Action it is apparent to applicant that certain documents are missing, e.g., copies of references cited, form PTO-1449, form PTO-892, etc., requests for copies of such papers should be directed to Errica Miller at (571) 272-4370.

Any inquiry of a general nature or relating to the status of this application or proceeding may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For
